

PRODUCTS FOR
THE AIRLINE INDUSTRY
GROUND SUPPORT

BREATHING AIR, OXYGEN &
NITROGEN BOOSTER SYSTEMS
AND AIRCRAFT JACKING

MAXPRO Technologies is a knowledge driven company dedicated to developing solutions for gas, air and liquid pressure applications. Maxpro's dedicated engineering expertise and CAD design capabilities enable the company to develop economical, turnkey packaged power systems to the customers specific requirements.

MAXPRO offers responsive sales and technical support coupled with competitive pricing and quick shipment for their entire product offering, including standard and custom design equipment.

Breathing Air Booster Systems Pressures to 5,000 psi

For Filling and Charging

- Aircraft cylinders
- Industrial plant and fire safety cylinders
- Municipal fire department storage cylinders
- SCBA or "escape" tanks

Skydrol Systems Portable and Stationary

- Pressure testing components and hoses with Skydrol
- Operational testing of sub assemblies with Skydrol
- All Stainless Steel construction with low and high pressure plumbing

Oxygen Booster Systems

**Pressures to 5,000 psi
For Filling and Charging**

- Aircraft on-board oxygen cylinders
- Scuba dive tank back packs
- Fire, safety and rescue back packs

Nitrogen Booster Systems

**Pressures to 3,000 psi, 6,000 psi
and higher**

Portable for Easy Mobility

- Helicopter “Pop Float” inflation
- Shock strut charging
- Hydraulic accumulator charging

Aircraft Jacks

MAXIMATOR air driven liquid pumps and **MAXPRO** power packs provide safe and dependable hydraulic lifting power for aircraft jacks. Pumps may be sized in accordance with the jack lifting tonnage requirements. Both electric and manually operated jacks may be retrofitted to incorporate one of these easy to use liquid pumps or power packs.

MAXPRO Technologies offers a complete line of Maximator air driven products to help improve the efficiency and cost effectiveness of your operation. These Maximator components include liquid pumps, air amplifiers and gas boosters. In addition, MAXPRO has a wide range of standard and custom designed packaged power systems that provide economical, turn-key solutions for a wide range of liquid, air and gas applications. For more information, request MAXPRO's Pump, Air Amplifier, Gas Booster & Packaged Power System Catalogs.
